Summary of Accounts Receivable Automation

SERRALA

Streamlining Accounts Receivables: Overcoming Operational Challenges with Smart Automation

In accounts receivable, manual processes, unclear operations, and outdated data slow things down. These challenges make decision-making tough, hinder tech upgrades, and limit growth. With delays in cash and tangled rules, finding skilled help is tough. Organizations need advanced technologies that seamlessly integrate into their current systems and enhance collaboration through smoother workflows to tackle these hurdles head-on

Why?

Solving critical financial challenges

- Optimize Working Capital
- Reduce DSO by improving downstream & upstream processes (credit & collections)
- Better Cash Flow Management
- Improved Efficiency and Speed
- Enhanced Accuracy and Reduced Errors
- Increased Productivity
- Improved Customer Relationships

What?

Automated AR excellence

- SAP S/4HANA certified
- Posts and updates data in SAP in real-time
- Business owned reducing IT dependency
- Facilitates AI & ML features for matching
- Smart AI KPI-based collections scoring engine
- AI-KPI engine to effectively determine and prevent customer credit risk based on real-time 360 Degree scorecard
- Smooth User Experience via SAP Fiori Apps

How?

Background

In a rapidly evolving business landscape, optimizing working capital is crucial for success. Traditional accounts receivables (AR) management struggles with manual, error-prone processes that slow down cash flow and hinder decision-making. The lack of automation leads to inefficiencies, delays, and increased risks, making it imperative for businesses to automate their AR processes.

Automating AR processes addresses these challenges by transforming AR management through streamlined operations, reduced manual effort, and enhanced accuracy. Automation accelerates cash flow and provides real-time visibility into KPIs like DSO, enabling more informed and timely decisions.

By automating AR, businesses can optimize working capital, improve efficiency, and reduce the risk of errors. Advanced technologies and seamless integration with existing systems ensure that companies can scale their operations effectively, adapt to market changes, and maintain a competitive edge. Automation empowers organizations to drive growth and achieve financial stability in an increasingly dynamic market.

What is Accounts receivable (AR)

Accounts receivables (AR) is the money clients owe the company for products or services delivered on credit. It is a crucial component of a company's balance sheet, reflecting the short-term assets expected to be converted into cash within a business cycle. Efficient AR management is vital as it directly impacts cash flow, liquidity, and overall financial health. It involves tracking customer invoices, ensuring timely collections, handling disputes, and maintaining accurate financial records to support operational efficiency and profitability.

How Serrala covers the business process

Serrala offers comprehensive solutions that automate and optimize the entire accounts receivables process. These solutions are embedded within SAP, providing seamless integration and enhancing existing systems. Serrala’s offerings include:

- **Cash Application Automation:** Streamlines the process of matching incoming payments to the corresponding invoices, reducing manual effort and errors.
- **Credit and Risk Management Automation:** Enhances the assessment and monitoring of customer creditworthiness, helping to mitigate financial risk.
- **Collections & Disputes Automation:** Facilitates efficient management of collections and resolution of disputes, ensuring faster recovery of outstanding payments and improving customer relations.

By leveraging advanced technologies, Serrala ensures real-time visibility, increased accuracy, and improved efficiency, allowing businesses to optimize their working capital and achieve financial stability.

Core Story

At Serrala, we are dedicated to equipping businesses with comprehensive AR automation solutions that revolutionize financial operations and empower CFOs to concentrate on strategic priorities.

Our AR Automation encompasses cutting-edge solutions for cash application, credit risk management, along with collections and disputes, seamlessly integrated within SAP to deliver unparalleled efficiency and control over accounts receivable processes. Compliant with clean core standards and embedded within SAP, our solutions enable highly automated receivables matching with real-time updates and posting.

Leveraging artificial intelligence (AI) and machine learning (ML), FS² AutoBank, FS² Collections, and FS² Credit provide intelligent automation, drastically reducing manual efforts, minimizing unapplied cash, and mitigating credit risks effectively. By adopting our integrated AR automation, organizations can streamline operations, drive cost savings, accelerate growth, enhance workforce productivity, and optimize working capital processes.

From automating cash application to proactively managing credit risk and optimizing collections strategies, our solutions empower finance teams to unlock new levels of efficiency, agility, and financial performance across the entire accounts receivable lifecycle.

Task list in the AR Process

Customer onboarding (For new customer - External data)

- Customer credit application
- Compliance checks - KYCs

Set-up customer master data

Assess the credit worthiness

- Customer credit application
- Compliance checks - KYCs

Credit limit & Risk determination

- Limit application & Management (Giving approvals, credit decision making)

Monitoring the credit portfolio

- Limit application & Management (Giving approvals, credit decision making)

Order retrieval

- Order creation
- Order check
- Releasing credit holds/order blocks

Delivery of order

Billing

Factoring

Dispute & deductions

- Identification (Short payment on invoice, portal, email, call)
- Validation (Gather back-up documentation)
- Review & resolution
- Notification to customer
- If resolution is positive, credit note is created

Collections

- Identification (Short payment on invoice, portal, email, call)
- Validation (Gather back-up documentation)
- Review & resolution
- Notification to customer
- If resolution is positive, credit note is created

Cash application

- Identification (Short payment on invoice, portal, email, call)
- Validation (Gather back-up documentation)
- Review & resolution
- Notification to customer
- If resolution is positive, credit note is created

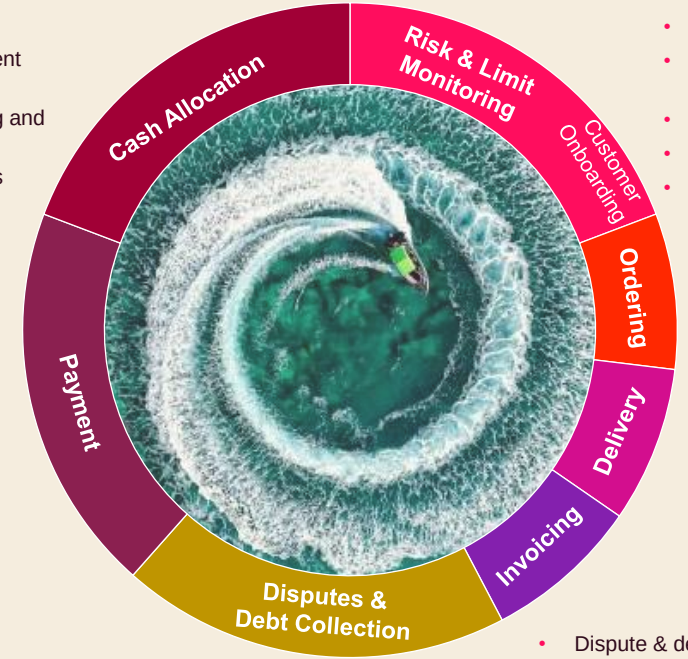
Serrala's AR Automation

SERRALA

Order-To-Cash Process

Cash Application

- Real-time cash allocation
- Automates incoming payment processing
- Smart and flexible matching and reconciliation
- Covers all incoming formats
- Automatic electronic bank statement and remittance advice processing



Credit Management

- Customer onboarding / KYC
- Risk prevention
- Determine & manage credit limits and risk ratings
- Release blocked sales orders
- Retrieve external information
- Continuous monitoring and proactive alerts

Collections Management

- Dispute & deduction management
- Inhouse debt collection
- External debt collection, factoring
- Legal/ court debt collection
- Debt management
- Debt collection scoring

Key Challenges Addressed by AR automation

1. Automation Deficiency and Resource Constraints

The lack of automation, coupled with a shortage of skilled personnel and limited time/resources, severely hampers AR efficiency. Manual processes are time-consuming and error-prone, leading to delays and inaccuracies.

2. Operational Inefficiencies in AR

Accounts receivable operations are burdened by manual processes, causing cash delays and limited collaboration. This inefficiency hinders the overall operational flow, impacting the company's financial health.

3. Transparency and Insight Gaps

A lack of transparency and absence of real-time insights limit visibility into Key Performance Indicators (KPIs). This impedes informed decision-making and hinders performance optimization, leaving the business in the dark.

4. Decision-Making & Scaling Challenges

Decision-making is obstructed by unreliable data and inadequate reporting. Unpredictable market conditions further complicate the scenario, leading to suboptimal decisions and difficulty adapting to changes.

5. Data Chaos and Technology Struggles

Struggling with unstructured data and the rapid pace of technological evolution, AR processes face scalability issues, complex regulations, and inflexible systems. This chaos impedes operational efficiency and stifles growth potential.

Value Proposition

We help global finance teams using SAP ERP optimize accounts receivable processes with Serrala's AR Automation, a comprehensive set of scalable and integrated solutions. Our SAP-embedded, S/4HANA-ready solutions enhance productivity, provide real-time and accurate data for peace of mind, all while maintaining SAP as your single source of truth and maximizing your SAP investment. With consistent visibility into critical KPIs like DSO and working capital, Serrala AR Automation enables faster cash application, implements effective collection strategies, and enforces credit guidelines efficiently, improving overall financial efficiency and performance.

Positioning

We help global finance teams using SAP ERP optimize their accounts receivable processes with Serrala AR automation, an SAP-integrated solution that provides a 360-degree view of customer and process data. Our tool ensures compliance by connecting to credit insurance providers and supporting obligatory reporting. With multiple scorecards at the credit segment level and intraday processing in the cash app, Serrala delivers real-time insights and efficiency. Business-owned posting rules and external data exchange for factoring and collections enhance flexibility. By automating up to 90% of manual tasks, Serrala accelerates cash processing, reduces DSO by improving upstream and downstream processes, and frees up cash flow, improving working capital management and financial performance.

Messaging

Maximizing SAP investment

- SAP remains single source of truth
- Tailored for enhancing SAP ERP ecosystems
- Centralized accessibility of data
- Real-time updates within ECC and S/4HANA environments
- Supports effortless upgrades and migrations

Intelligent automation

- AI and ML drive smart automation through AI matching & AI driven collections and credit scoring
- Business owned rule setting accelerates workflow automation
- Increased collaboration & productivity through manual effort reduction, & increased efficiency

Enhanced transparency into financial insights & business growth

- Boost visibility for critical metrics like DSO, Working Capital
- Empower data-driven decisions, optimizing financial health
- Supports growth by easily scaling the processes

Stability & Security while being highly Scalable

- Increased accuracy of data across systems
- Compliance and audit ready
- Proactive risk mitigation

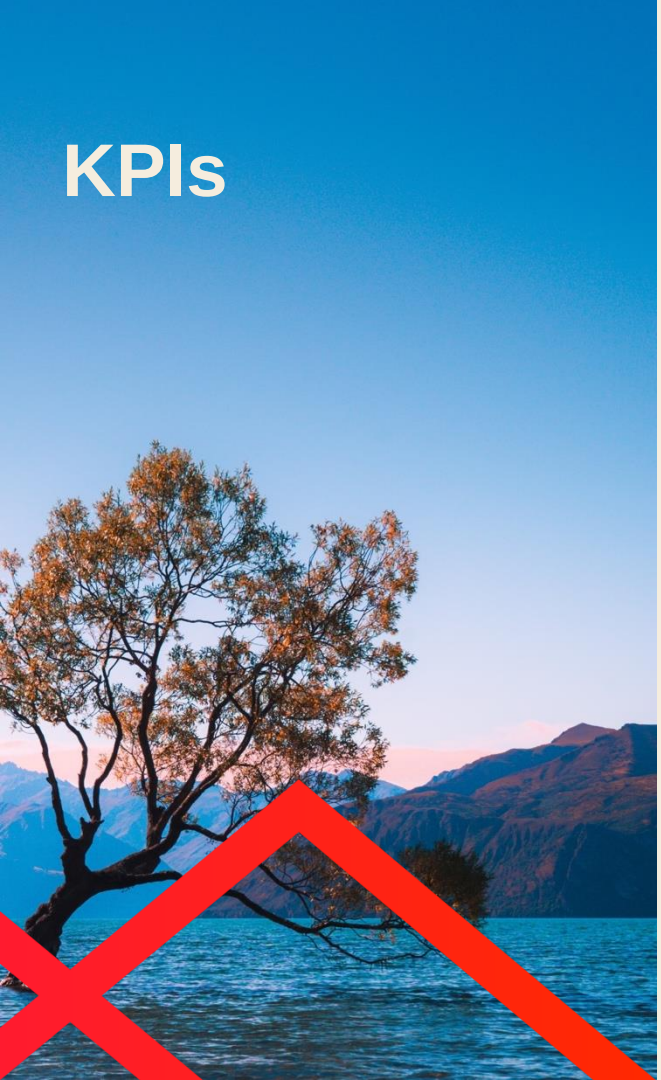
Elevator Pitch

Are you curious about how leading organizations are excelling at reducing DSO? Unlock the full potential of your order-to-cash process effortlessly with our game-changing AR Automation solution, tailor-made for seamless integration with SAP. Say goodbye to manual headaches and hello to a future of streamlined operations, heightened efficiency, and unparalleled transparency.

Our AI-driven, SAP-embedded end-to-end AR automation solutions utilize real-time data from all AR stakeholders, with SAP as the single source of truth. With a 360-degree view of customers and processes, we reduce DSO by improving upstream and downstream processes, and enhance efficiency. Join over 500 happy customers who have transformed their AR processes and achieved new levels of excellence.

Our solution is not just about automation; it's about optimizing your SAP environment to its fullest, enhancing user experience, supporting you on your S/4HANA journey and setting a new standard for excellence in Order-to-Cash. Elevate your business with the perfect synergy of SAP and our AR Automation solution. Contact us today to see how we can help you achieve these outcomes!

KPIs



- Achieve cash app automation rate up to 99%
- 100% automated and real-time collection tasks
- Reduce bad debt by a min of 10%
- Achieve up to 85% effort reduction in cash app
- Reduce DSO by a min of 10%
- Improve your risk management and avoid impairment losses.
- End-to-end dispute case management
- Eliminate unapplied cash & misapplied cash, up to zero

Glossary of Important Terms

SERRALA

Term	Description
Accounts Receivable (AR)	The money owed to a business by its customers for goods or services provided on credit.
AR Automation (Accounts Receivables Automation)	AR automation refers to the use of technology and software to automate various tasks and processes within accounts receivables management, including invoice generation, payment processing, collections, and reconciliation.
Bad Debt	Unpaid invoices that are unlikely to be collected and are written off as a loss.
DSO (Days Sales Outstanding)	DSO is a financial metric that measures the average number of days it takes for a company to collect payment from its customers. It helps assess the efficiency of accounts receivable management and the time it takes to convert sales into cash.
Credit Management	The process of assessing a customer's creditworthiness and setting credit limits to minimize the risk of non-payment.
Customer Collections	The process of gathering payments from customers to settle outstanding invoices, ensuring that accounts receivables are converted into cash.
Cash Application	The process of matching received payments to specific invoices in the accounts receivable ledger.

FS² AutoBank

SERRALA

Why – Our Value Prop

We help global finance teams using SAP ERP streamline cash application processes by offering FS² AutoBank, an SAP embedded solution that achieves the highest level of end-to-end automation. With FS² AutoBank, businesses can ensure ownership and scalability of their cash application solution while reducing manual tasks by up to 90%. By enabling same-day receivables matching and supporting all bank file formats, FS² AutoBank accelerates cash processing, reduces DSO, and frees up valuable cash flow, ultimately improving visibility into critical KPIs like Working Capital while enhancing financial efficiency and performance.

.

Benefits

- Streamlined, end-to-end cash application process
- AI driven payment matching
- Reduction of manual and repetitive tasks by 85%.
- Achieve automation rates of up to 99%.
- Supports all incoming file formats
- Processing complex remittance advices.
- Same day receivables matching

Use cases covered

✓ Automated payment matching

✓ Data extraction and entry

✓ Real-time payment posting

✓ Partial and Overpayments Handling

✓ Exception Handling

✓ Customer Account Management

✓ Reporting and Analytics

✓ Integration with ERP and Banking Systems

✓ Fraud Prevention

✓ Customer Self-Service

✓ Compliance and Auditing

SIEMENS AWWG VATTENFALL GE VERNOVA Medtronic brf zoetis ABB HILTI

FS² Collections & Disputes

SERRALA

Why – Our Value Prop

For global finance teams using SAP, Serrala FS² Collections & Disputes offers efficient solutions for collections and disputes management, seamlessly integrating with ECC and S/4HANA for real-time updates. Leverage advanced AI strategies, digitized collections files, and end-to-end support to streamline processes, reduce costs, and optimize credit lines. Enhanced team collaboration and advanced reporting tools improve coordination and provide valuable insights, boosting financial operations and customer satisfaction while ensuring business continuity and success..

Benefits

- 100% automated and real-time collection tasks
- Significant reduction in collections life-cycle for improved KPIs (Min 30% FTE Reduction and min 50% efficiency gains)
- Unique collection scoring to proactively define high risk and default accounts
- Centralized and end-to-end dispute and deductions management

Use cases covered

✓ Integrated Customer Communication

✓ Unified Customer Account Management

✓ Automated Workflow Management

✓ Payment and Dispute Handling

✓ Intelligent Dispute Resolution

✓ Proactive Risk Management

✓ Enhanced Reporting and Analytics

✓ Compliance and Documentation

✓ Customer Segmentation and Strategy

✓ Enhanced Customer Experience

✓ Unified Customer View

FS² Credit & Risk Management

SERRALA

Why – Our Value Prop

For global finance teams using SAP, Serrala FS² Credit offers tailored solutions for credit & risk owners. Our smart automation integrates seamlessly with ECC and S/4HANA, and provides real-time updates. With advanced AI automation you can maximize revenues, minimize risk, enhance efficiency, reduce costs, and optimize credit lines in real-time. Boost financial operations and customer satisfaction, ensuring business continuity and seizing opportunities.

Benefits

- Fast and effective onboarding
- AI driven credit scoring models
- Fully automated financial analysis with 100% automated credit scoring
- Significant time savings on credit limit application processing and approvals
- Significant reduction on daily blocked order volumes with min. of 10% bad debt reduction
- Comprehensive 3rd party credit information and insurance integration

Use cases covered

✓ Credit Scoring and Assessment:

✓ Risk Monitoring and Alerts:

✓ Credit Risk Analysis:

✓ Customer Segmentation:

✓ Automated Decision Making:

✓ Reporting and Analytics

✓ Compliance and Documentation:

Our USPs

These are our unique features compared to the AR non-SAP and cloud options in the market

1 Improved Visibility

360 view of customer and process enhancing SAP user experience

Multiple Scorecard in place on credit segment level

2 High Automation

Up to 99% cash application automation

Intraday processing in cash app

3 Business Owned Solutions

Flexible posting rules that are business owned reducing IT tickets and dependency

4 Enhanced Collaboration

External data exchange and postings (factoring and external collections)

The connection to credit insurance provider & obligatory reporting

5 Single Source of Truth

SAP embedded, S/4HANA ready

Real-time updates in SAP

ICP – Ideal Customer Profile

Criteria	Ideal Fit	Minimum requirements	Possible disqualifiers
Target Market - Organization Firmographics	• Annual revenue: Euro 200-500M+ • Region: DACH, EMEA, NA • Size: 1000+ • Industry: All SAP ERP users		• Very large enterprises 50 bn+ are generally too demanding for our limited experts to support
Technographics	• ERP = SAP ECC 6.0 or higher • Moving to SAP S/4HANA Private Cloud • Legacy/unique enterprise systems • Complex business process	• ERP = SAP ECC 6.0 or higher	• SAP S/4HANA Public cloud • No SAP system • On wrong versions of SAP S/4HANA • Unique integration requirements
Psychographics	• Innovative • SAP centric roadmap		• Tire kicker, unable to make a commitment after several attempts • Extremely security conscious and cannot grant access to SAP systems
Business Situations	• Expanding into new markets • High growth businesses • High volume of transactions		
Operating Model	• Global B2B or B2C • Regional or Global Shared Services or Center of excellence		
Resources	• Larger team with SMEs that want to do more than automate – want to transform processes • Order to Cash – Invoice to Cash - AR-Shared Services	• Small team that needs automation to handle growing workload • Need a SME and technical basis team support to support implementation, testing.	• 20:1 client to Serrala staff ratio • Serviced by entirely offshore consulting resources?

Buyer group - Accounting/Finance

Role: Key-User & Decision maker

Description: Serve as a key individuals enabling and managing the AR/cash app team to effectively achieve the accounts receivables objectives set out.

Place In Org: Finance (CFO) Organization

Qualifying Questions

- Do you have any automation in your accounts receivable processes?
- How many FTEs do you have in the AR department?
- Do you have any O2C/AR metrics you'd like to achieve (auto-match)?
- What is your current DSO and what strategies do you have to reduce it?
- How do you handle disputes and deductions?
- What challenges do you face in generating AR reports and KPIs?

Objectives

- Standardized Processes: Implement solutions for automated and standardized AR transactions.
- Efficiency Improvement: Enhance process and personnel efficiency by reducing manual tasks.
- Enhanced Visibility: Increase visibility to key KPIs like Working Capital, DSO, and Cash Flow.
- Improved Cash Flow: Optimize cash flow by reducing delays and ensuring timely collections

Pain Points

- Manual Errors: Inefficiencies and high costs due to manual processes.
- Resource Shortages: Limited skilled personnel and time/resources.
- Cash Allocation Delays: Slow, inefficient cash application.
- Visibility Gaps: Lack of real-time insights into key KPIs.
- Disjointed Processes: Fragmented, non-integrated AR systems.
- Employee Burnout: Low morale from repetitive, manual tasks

.

Purchase Triggers

- Financial Reporting Accuracy: Collecting, verifying, and analyzing large volumes of AR data pose significant challenges.
- Process Optimization and Automation: Implementing new technologies to streamline AR operations and improve efficiency and insights.
- Real-Time Data Access: Need for real-time data to support operational objectives and manage strategies for best possible results.
- Increased Productivity: Improve FTE productivity and accuracy, enhancing customer satisfaction and reducing churn.
- Regulatory Compliance: Ensuring compliance with financial regulations and standards through automated processes.

Buzzwords

CFO Reporting, KPI, DSO, Cash-Flow, Automation, cash allocation, Working Capital

Common titles

- Global process owner – O2C
- Director of AR
- AR manager
- Finance Director

Buyer group - IT

Role: Gatekeeper / Decision maker

Description: Effectively leverages IT landscape, Seamlessly introduces innovations, Leverages technology to support business objectives.

Place In Org: IT department for finance function

Qualifying Questions

- When were processes reviewed for the last time?
- Do you use SAP, S/4HANA?
- If they are not using S/4 HANA- What are your plans to migrate to S/4 HANA?
- What are your security policies around cloud connections?
- How does your current solution integrate with SAP?

Objectives

- Minimize risk & increase security per standard regulations
- Standardize IT systems thus reduce costs
- Effectively transition to newer technologies for innovations
- Leverage technology to support business needs

Pain Points

- Risk of data security & privacy
- High IT costs from data growth & infrastructure
- Mix of current and legacy systems
- Long enquiry times & lack of quick data visibility
- Complex upgrades and S/4HANA migrations
- High volume of tickets from business

Purchase Triggers

- Mandate to maximize SAP investment.
- Reduce operational costs.
- Manage risk – keep risk at bay with tools to monitor for fraud, track of customer and vendor credit scores, and prevent unauthorized access to information
- Improve UX with FIORI and mobile/web access;

How the solution helps

- Leverage your SAP investment with a (3rd party) solution that is embedded with SAP
- Supports SAP's clean core approach
- Certified by SAP for ECC and S/4HANA

Buzzwords

Processes Implementation, Change Management, Adaptability, Scalability, Compliance, Auditability, Lean Process Management

Common titles

- IT director
- IT procurement manager

How to Sell AR Automation

Combining FS² AutoBank, FS² Collections, and FS² Credit in AR automation offers unparalleled advantages for companies seeking to optimize their financial processes. By seamlessly integrating FS² AutoBank 's automated reconciliation capabilities with FS² Collections' efficient management of overdue accounts and FS² Credit's sophisticated risk analysis tools, businesses gain a comprehensive solution for maximizing cash flow and minimizing risk.

This dynamic synergy provides real-time insights into customer payment behavior, trends, and credit risks, enabling proactive decision-making and timely intervention. With faster identification and processing of receivables tasks, companies can enhance their cash flow, improve working capital contribution, and mitigate bad debt losses. Ultimately, this integrated approach empowers companies to streamline operations, optimize credit terms, and strengthen their overall financial health in a rapidly evolving business landscape.

Cross-selling FS² Collections to FS² AutoBank

The dynamic combination of FS² Collections with FS2 AutoBank plays a pivotal role in streamlining and improving accounts receivable processes in SAP. FS2 AutoBank automates the reconciliation of incoming payments, reduces manual efforts and risk of errors, enabling FS2 Collections to accelerate the entire collections cycle.

Whilst FS2 AutoBank ensures real-time visibility into payment statuses and timely application of funds, it enables FS2 collections to instantly notify assigned collections clerks on overdue accounts and customer deductions.

Benefitting from this unique synergy, it not only provides great and real-time insights in customer payment behavior and trends but also contributes to improved cash-flow and working capital contribution through faster identification and processing of account receivables tasks.

For superior efficiency

Cross-selling FS² Credit to FS² AutoBank

Companies can enhance their credit risk management by leveraging cash applications to gain deeper insights into customer payment behavior and financial stability. By integrating FS² AutoBank data with FS² credit risk, trends, patterns, and outliers in customer payment histories can be more effectively identified. This enables FS² Credit to monitor credit risk indicators automatically and proactively through an embedded credit risk scoring model. Late payments or deteriorating payment patterns instantly alerts credit clerks of a change in risk score or classification, allowing companies to promptly assess and mitigate potential risks.

Additionally, by streamlining the reconciliation process, cash applications enable quicker identification of delinquent accounts, facilitating timely intervention to minimize bad debt losses. Ultimately, leveraging cash applications in credit risk management empowers companies to make informed decisions, optimize credit terms, and strengthen overall financial health.

For ultimate transparency

Company	**Zoetis**
HQ	**New Jersey, United States**
Industry	**Pharma & Life Sciences**

Success Stories

As the world's leading animal health company, Zoetis is driven by a singular purpose: to nurture our world and humankind by advancing care for animals. After 70+ years of innovating ways to predict, prevent, detect and treat animal illness, Zoetis continues to stand by those raising and caring for animals worldwide from livestock farmers to veterinarians and pet owners. The company's leading portfolio and pipeline of medicines, vaccines, diagnostics and technologies make a difference in over 100 countries. In everything we do, we are guided by science and inspired by our shared love of animals. We truly believe that through this fusion of passion and research, we can accomplish anything.

Solution Implemented

FS^2 AutoBank | FS^2 Credit | FS^2 Collections

"After an RFP journey and various demo sessions, it was evident that Serrala could deliver on all our project objectives with their Order to Cash Solution Suite." - Amy Valiant (Global Process Owner)

Challenges

- Streamline end-to-end processes
- Improvement of cash-application rates
- Support S/4HANA migration with suitable I2C solutions
- Centralize operations for more efficiency and cost reduction
- Need to be more customer centric

Result

- Intelligent capture and automated harmonization eliminates manual tasks
- 30% increase in return on investment (ROI)
- Automation enables staff to handle increasing transaction volumes and strategic rule building
- Reduce the days sales outstanding (DSO) from 30 days by 2-5 days
- Increased control and visibility leads to improved customer satisfaction levels

Company	**Villeroy & Boch**
HQ	**Mettlach, Germany**
Industry	**Manufacturing**

Success Stories

Villeroy & Boch is a renowned European brand celebrated for its exquisite tableware, bathroom, and wellness products. With a legacy dating back over 270 years, Villeroy & Boch embodies timeless elegance, exceptional craftsmanship, and innovative design. From luxurious dinnerware sets to sophisticated bathroom collections, Villeroy & Boch's products combine functionality with aesthetic appeal, enhancing everyday living spaces with style and sophistication. With a commitment to quality and innovation, Villeroy & Boch continues to set the standard for premium home products worldwide.

Solution Implemented

FS^2 Credit | FS^2 Collections

Challenges

- Need for reduction of manual interventions in credit limit applications and approvals in real-time
- Low efficiency of employees in credit and receivables management
- Need for risk mitigation in case of bad-dept losses and credit limit adjustments

Result

- FS^2 solutions provides continuous improvement and transparency in day-to-day operations
- Cash-application rate increased by 30%, resulting in a 35% saving in FTE’s
- Full automation of all key O2C processes drives effective and more traceable communication, supporting day-to-day business objectives in a structured yet flexible way

Company	**Vattenfall**
HQ	**Stockholm, Sweden**
Industry	**Energy, Utilities & Waste**

Success Stories

Discover the forefront of sustainable energy with Vattenfall, a leading European energy company dedicated to driving a greener future. With a legacy rooted in innovation and environmental responsibility, Vattenfall pioneers' solutions that revolutionize energy generation, distribution, and consumption. From renewable wind and solar power to groundbreaking advancements in electric mobility and energy storage, Vattenfall is shaping a more sustainable world. Explore the journey towards cleaner, smarter energy solutions, where innovation and sustainability pave the way to a brighter future.

Solution Implemented

FS² AutoBank

Challenges

- Highly manual processing of cash application handling
- Lack of cash application efficiency for high volumes

Result

- 99.3% automation rate
- Significant reduction in staff needed for cash reconciliation despite 20 years of company growth
- Self-sufficient team on posting logic and solution optimization
- Reduced impact on customers as reduction of unmatched payments

Company	**Medtronic B.V.**
HQ	**Heerlen, Netherlands**
Industry	**Healthcare Services**

Success Stories

Medtronic

Discover the forefront of medical technology with Medtronic BV, a pioneering company committed to transforming healthcare worldwide. With a legacy of innovation spanning decades, Medtronic BV leads the industry in developing cutting-edge medical devices and therapies that improve patient outcomes and enhance quality of life. From advanced surgical solutions to life-saving cardiac and neurological treatments, Medtronic BV's groundbreaking innovations continue to revolutionize the healthcare landscape, shaping a healthier, more hopeful future for patients and providers alike.

Solution Implemented

FS^2 AutoBank

Challenges

- Take higher automation rates already achieved in EMEA to NA, APAC and Latin America
- Reduction of blocked orders and increase of financial performance by obtaining accurate figures faster for liquidity planning

Result

- Increased cash accounting automation by 90% and increased invoice-to-cash automation
- Improved liquidity planning and working capital management
- Further enhancements also in EMEA: Customer account statements are up-to-date in real time

Company	**Evonik**
HQ	**Essen, Germany**
Industry	**Chemical**

Success Stories

Evonik is a leading specialty chemicals company known for its innovative solutions and global presence. With a diverse portfolio spanning various industries such as automotive, healthcare, agriculture, and consumer goods, Evonik develops high-performance materials, additives, and technologies that drive progress and sustainability. Through a commitment to research and development, Evonik continuously delivers value to its customers, addressing complex challenges and shaping the future of industries worldwide.

Solution Implemented

FS^2 Collections

Challenges

- Manual collection strategies and approval flows that take a lot of time
- Bad-dept losses need to be minimized through timely and effective customer communications
- Need to increase the efficiency of employees in Accounts Receivables management

Result

- FS^2 solutions provided improvement and transparency in day-to-day operations
- Significantly reducing manual efforts and increasing productivity, standardization resulted in faster and more accurate data output whilst having centralized visibility
- Standardized communication and reduced error risks improved alignment, customer satisfaction

SERRALA

Company	**Hikma Pharmaceuticals**
HQ	**London, United Kingdom**
Industry	**Pharma & Life Sciences**

Success Stories

hikma.

Hikma Pharmaceuticals is a global leader in the production of generic and branded pharmaceuticals, serving patients in over 50 countries worldwide. With a focus on delivering high-quality, affordable medications across a wide range of therapeutic areas, including oncology, cardiovascular, and infectious diseases, Hikma is committed to improving access to healthcare globally. Through innovation, research, and strategic partnerships, Hikma continues to expand its product portfolio and reach, ensuring that patients have access to safe and effective treatments that improve their quality of life.

Solution Implemented

FS² Credit

"The implementation of the SAP integrated Credit and Risk Management solution
FS² Credit was picked as one of the best project we conducted in 2020."
— Ibrahim Armouti (Group Treasurer)

Challenges

- Proper and automated work and approval flows are not ensured
- Need for automated notifications for credit review through systems
- Need for standardized credit reports and communications
- Credit scoring and applications not done through system

Result

- FS² Credit, combined with connector for Credit Rating information has simplified day-to-day work and allows rapid actions in an agile operational landscape
- As a growing company with global presence, it is beneficial to operate on defined standards
- FTE productivity increased, clients are served faster and more accurately
